Arvin Garcia

+63 9XX-XXX-XXXX | work@arvingarcia.com | github.com/arvingarciabtw | arvingarcia.com

Education

Mapúa University Makati, Metro Manila
Bachelor of Science in Computer Science *2022 — 2027*

- GWA: 1.486 | Dean's List, President's List
- Relevant Coursework: Software Engineering, Web Systems and Technologies, Artificial Intelligence, Human Computer Interaction, Application Development & Emerging Technologies, Data Structures and Algorithms

Work Experience

Fullstack Developer Intern Jun 2025 — Aug 2025
Bridge360 (bridge360.ph) *Remote*

- Led the complete UI/UX overhaul of a blue-collar gig web platform, by designing comprehensive end-to-end wireframes and interactive user flows in Figma to modernize the product experience.
- Rebuilt the entire React frontend to match the new user interface, refactoring legacy global styling into scoped CSS Modules to eliminate persistent cross-component layout leaks across pages.
- Developed RESTful CRUD endpoints for job listings using Node.js, Express, and MongoDB, and integrated automated email services to streamline user onboarding and account activation.

Web Developer Volunteer Jan 2025 — Mar 2025
Mindoro Biodiversity Conservation Foundation Inc. (mbcfi.org.ph) *Remote*

- Partnered with department leads at a licensed biodiversity non-government organization to build a PHP, Laravel, and MariaDB project management system prototype supporting their core programs.
- Implemented role-based access control separating public viewing from admin-only project creation, editing, and deletion, and added search and external links so users can find and follow up on any project.
- Delivered the prototype to stakeholders in a formal demonstration and completed a full technical hand-off to the organization's web maintenance team for integration with the main website.

Projects

Ditto (ditto.arvingarcia.com) Jun 2026 — Present

- Developed a cross-platform, system-wide terminal keycaster and keyboard visualizer in Go utilizing Bubble Tea and Lipgloss, featuring real-time keycasting functionality alongside automatic color scheme synchronization.
- Packaged and distributed production releases across the Arch Linux User Repository and GitHub Releases, building developer community engagement to reach **120+ GitHub stars** and **150+ tracked binary downloads**.
- Built low-level system input capturing using raw evdev event streams, while implementing cross-platform key mapping logic to maintain full compatibility across Linux, Windows, and macOS installations.

Open Source

BetterGov.ph (bettergov.ph) Contributor

- Configured automated link integrity auditing using Lychee and scheduled GitHub Actions workflows to validate nearly **200 site URLs** bi-monthly and automatically report failures for maintainer review.

BetterCalapan (bettercalapan.org) Maintainer

- Developed a static municipal web portal using SvelteKit to centralize and improve public citizen access to essential local government services and directory information for Calapan residents.
- Built a localized hazard mapping subproject using SvelteKit to visualize floods, storm surges, landslides, earthquakes, and typhoons, allowing users to select specific barangays for detailed risk assessments.

Skills

- **Frontend:** Svelte, SvelteKit, React, TypeScript, HTML, CSS
- **Backend:** Go, Node.js, Express, REST APIs
- **Databases:** PostgreSQL, MongoDB, MariaDB
- **Tools & Platforms:** Git, GitHub Actions, Docker, Figma
